## VINIFICATION AND AGING

Clay limestone soil.

The harvest takes place late, between September 10 and October 10.

Nights are cooler in our area of the Var hinterland and our vineyard is located at an altitude of 300 m.

The harvest is carried out mechanically overnight between 3 and 9 am in the morning.

Vines are very close to our winery which allows us to bring grapes very quickly when pressed.

The skin maceration is rapid: 3 to 6 hours maximum for grenaches and 1 hour for syrah for example.

The settling is carried out cold (between 8 and 12 ° C) for 48 to 72 hours.

The alcoholic fermentation is launched at 14 ° C and then thermoregulated between 16 and 18 ° C for about 10 days.

We then proceed to aging on fine lees in stainless steel and concrete tanks for 2 months.

All the vats are then racked and filtered at the end of December.

Blends are carried out studiously at the start of January and the wine is ready for tasting. around February 15.

## BLENDING

40% Grenache - 30% Syrah—25% cinsault – 5% rolle

## TASTING
